SatoChip
Love.io

BLOCKCHAIN GAMING

Your metaverse journey begins here!

Learn, Play, Earn!

Blockchain-based ecosystem is a paradigm shift in the video gaming industry wherein for the first time digital assets can be truly owned and transferred permissionlessly. This cutting edge industry has quite a lot to offer not just for developers and designers but also for the players themselves. The resulting era of 'play-&earn' is due to the implementation of the blockchain ecosystem layer into the game. Several different approaches are being taken with the hopes to achieve a circular and sustainable ecosystem for the players. The assets are truly limited in numbers, governed by code and can be pure cosmetics or can have ingame utility all the while having complete ownership and trading capabilities.

Blockchain Gaming Technologies has the vision to accelerate and support the blockchain-based gaming industry by providing a wide range of products and services to the ecosystem as a whole.

CRYPTOBATES

We just want to say a big thanks to all our sponsors and supporters, its been a tough 18 months and we appreciate that you have stuck by us! Thank you for all your feedback and guidance with the event.

We'd like to give a big shout-out to Nind, NSF, MonetaryUnit, Isaac, Max, Andrew Wagner and Bitcoin Manchester, all who have been phenomenal not only in their support of the event but also to Adam (Our founder) through hectic times!
